

Primary Product Recommendation AI

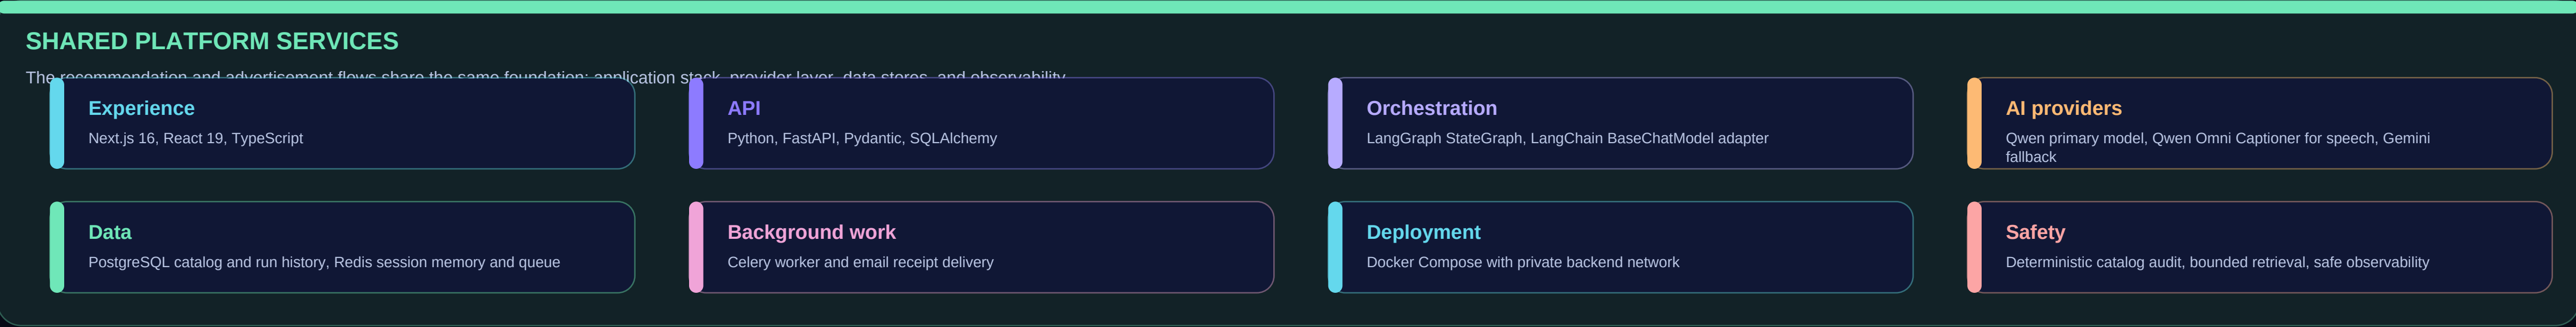

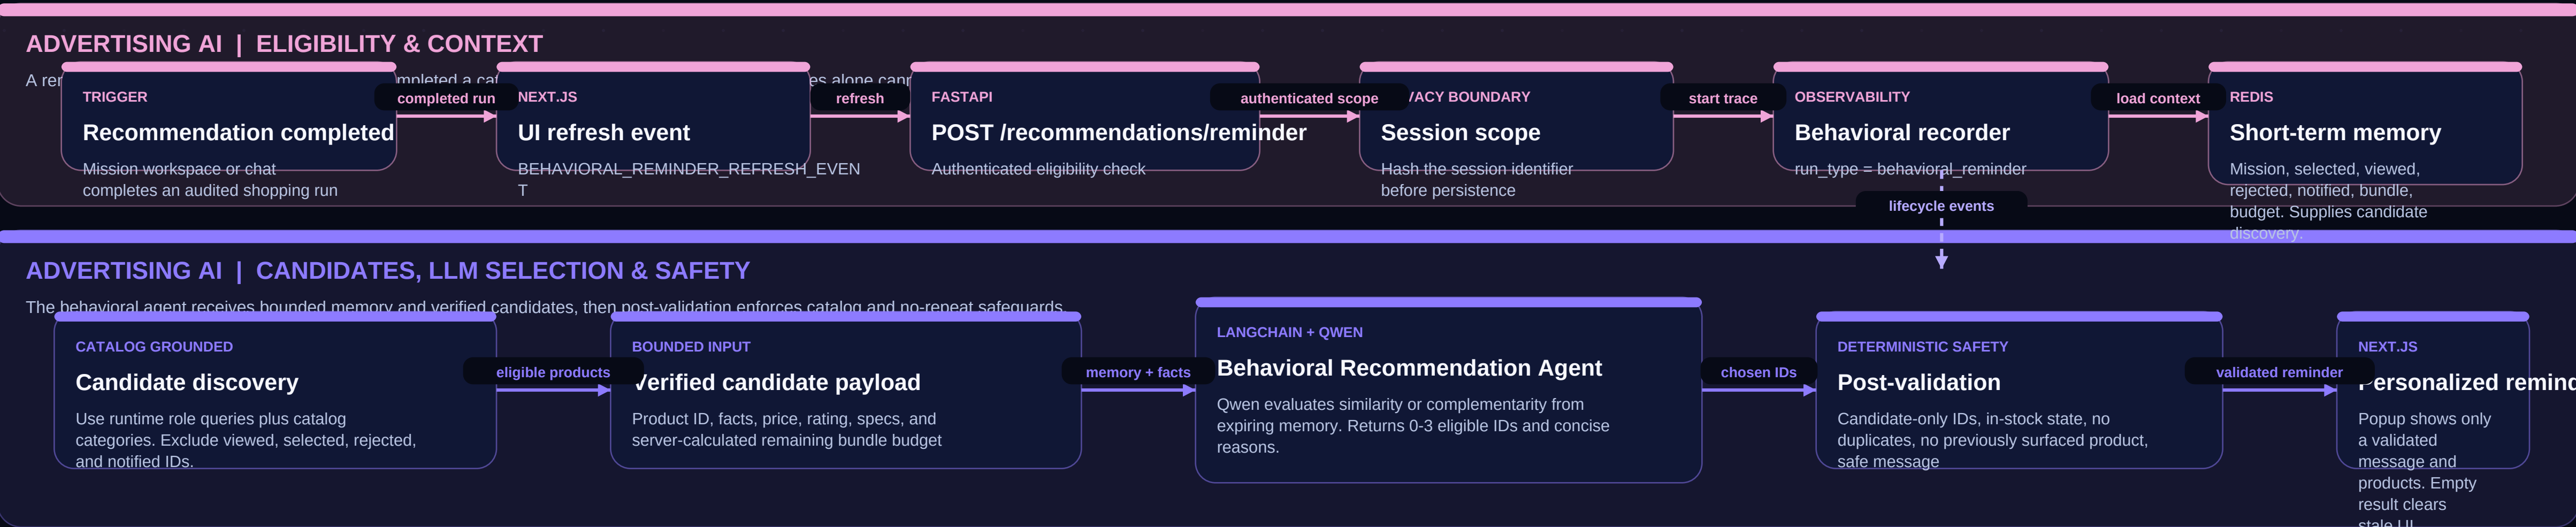

LangGraph workflow for text, voice, and vision missions. Every arrow names the state or decision that moves forward.

Source-grounded from backend/app/agenic/orchestrator.py and related agents. Dashed routes execute only when their stated condition applies.

Advertisement AI and Supporting Technology

Behavioral recommendations run as a separately observable, catalog-grounded reminder flow after completed shopping activity.

Key safeguards	Bounded catalog candidates	No raw session secrets in logs	No hallucinated product facts	No stale reminder if empty
----------------	----------------------------	--------------------------------	-------------------------------	----------------------------

Source-grounded from behavioral_recommendations.py, recommendations.py, observability.py, and the primary LangGraph workflow.
